

# Wild Blue Phlox

(*Phlox divaricata*)

**Sun Exposure:** shade/part shade

**Height:** 12 – 18in.

**Soil:** likes moist soil

**Bloom Season:** early spring

**Wildlife:** Attracts bees, butterflies and hummingbirds

Rabbits may eat foliage

**Fun Fact:** This is a woodland flower and can be quite impressive when in bloom, creating a fragrant carpet of color on the forest floor.

**\*NC Native**
