

Crossvine

(*Bignonia capreolata*)

CameliaTWU

Sun Exposure: full sun to shade (better flower production in sun)

Soil: can grow in a variety of soil types

Height: vine, can climb up to 50 ft

Bloom Season: late winter/early spring

Wildlife: Hummingbirds and butterflies eat nectar

Fun Facts: Semi-Evergreen

Grows by seed and root suckers. If you do not want it to spread, pull the root suckers when you see them.

***NC Native**
